

ANTI-MOULD PAINT

DESCRIPTION

Kingfisher ANTI-MOULD PAINT is a high quality acrylic based emulsion paint which when applied, provides a rich satin finish. The paint is specially formulated and contains an active film fungicide which will prevent any future growth of moulds or algae.

The fungicide is highly active against black spot mould growth (*Asperillus Niger*) usually associated with condensation and high humidity environments. The coating is effective for both internal and external surface applications and the fungicide will not leach out, even when wiped.

PREPARATION

Scrape off any loose paint and brush down to remove dust and flake. Apply a solution of Kingfisher [Mould Cure](#) with a sponge or brush and allow to dry. This will kill off any presence of mould.

Kingfisher ANTI-MOULD PAINT is simply applied with brush or roller.

AREAS FOR USE

Kingfisher ANTI-MOULD PAINT can be used in any situation where mould or algae growth has been a problem. The surface is fully washable so dirt and grime can be easily and simply wiped away.

PACKAGING

The product is supplied in Magnolia and White in 5 and 10 litre plastic containers.

STORAGE

Store in sealed condition away from frost.

HEALTH & SAFETY

- Avoid contact with skin and eyes.
- If contact occurs wash immediately with plenty of water.
- Keep out of reach of children.
- Ensure good ventilation during application and drying.
