

Micro KX5 Sanitiser

DESCRIPTION

KX-5 is a new revolutionary liquid micro-emulsion chemical in a water soluble sachets incorporating modern formulation technology along with environmentally friendly packaging. Available in a wide range of applications including; cleaning, gardening, timber preservation, biocides and pesticides.

USES

Heavy Duty Sanitizer/Disinfectant is an extremely concentrated sanitizer and disinfectant containing a highly potent biocide system specially formulated for the control of gram+ve bacteria and viral infections including Hepatitis B, MRSA, Salmonella, Listeria, Campylobacter and many more including a wide range of viral infections. Ideal for use in the sanitization of properties subjected to flood water damage. It should be used as a sanitizer prior to initial cleaning out of the property and also used as a part of the subsequent remedial works.

Flood water carries with it many types of bacteria, viruses, etc. Once the flood water has subsided, these bacteria and viruses remain within plaster, brickwork, timber joists, floorboards, fixtures and fittings. All of these areas require to be properly disinfected and sanitized prior to re-instatement works being carried out and ultimately re-occupation of the property. When used as part of initial remedial works after flood damage, the product will sanitize part of initial remedial works after flood damage, the product will sanitize and disinfect the entire area that has been susceptible to bacterial and viral contamination.

ADVANTAGES

- Reduced storage and transport.
- Convenient and easy to use single dose.
- Exact portion control without contact with chemical.
- Environmentally friendly packaging, reduced disposal costs.
- Free of solvents & VOC's (Volatile Organic Compounds).

APPLICATION

- Remove sachet from the outer packaging.
- Place 1 x 8g or 1 x 40g sachet in suitable container.
- Add 5 litres of water per 8g sachet or 25 litres of water per 40g sachet.
- Allow sachet to dissolve for 2 minutes, agitate if necessary then use as required.
- Use warm water to speed up dissolving time.
- Refer to material safety data sheet and product label for full Health & Safety Data.

Initially spray all contaminated areas prior to handling. Spray timbers that are to remain in-situ and brickwork prior to plaster re-instatement. Spray sub floor areas and soil.

PRODUCT DATA

TECHNICAL

Concentrate contains 66.7% Quaternary Ammonium Compound.
Diluted product contains <5% nonionic surfactant.

SIZE

8g concentrate sachet makes 5 litres of ready to use product.
40g concentrate sachet makes 25 litres of ready to use product.

STORAGE & SHELF LIFE

Store at ambient temperature and protect from frost and strong sunlight.
Shelf life is 2 years.

HEALTH & SAFETY

This product is a highly corrosive concentrate, **DO NOT** puncture the sachet.

- If applying by spray wear a face mask.
- Wear protective gloves, goggles and overalls during preparation and application.
- Avoid contact with skin and eyes.
- If contact occurs wash immediately with plenty of water.
- Keep out of reach of children.
- Ensure good ventilation during application and drying.
- Always dispose of empty packaging responsibly.
