

WOODZONE DUAL PURPOSE

DESCRIPTION

Woodzone Dual Purpose F/I is a super concentrate supplied in a small plastic container. The special micro-emulsion formulation leads to better penetration than obtained with the older traditional water based emulsified preservatives. It will provide the necessary control and long term protection of wood against wood boring insect infestation and wood destroying fungi for many years thereby giving confidence in any issued long-term guarantee. Kingfisher formulations are all cleared under the Governments Pesticide Safety Precaution scheme and under the Control of Pesticide Regulations 1986, for use as directed and carries the HSE Approval No 9176.

Bats: The active ingredients have been accepted by the Nature Conservancy bodies as suitable for the treatment of roof voids where bats roost. However it is a legal requirement to notify the appropriate Nature Conservancy body prior to any treatment of roof spaces where bats have been identified. Treatment must not be carried out whilst bats are at roost (see Safety).

(Refer to these individual product data sheets for detailed application guidance – published on our website www.kingfisheruk.com)
